### **Advanced Electrophoresis Solutions signs an exclusive distributor partner for Europe**

Cambridge, Canada – February 9, 2016 – AES (Advanced Electrophoresis Solutions Ltd.), a pioneer in designing and manufacturing the most reliable, high performance, and high throughput CEInfinite whole column imaging detection capillary isoelectric focusing (iCIEF) systems, proprietary cartridges, ampholytes, and pI standards for the life science industry, is pleased to announce Isogen Life Science B.V. as the exclusive distributor of its products in Europe. Under the agreement Isogen Life Science will also become the provider of service and application support in the covered regions.

“Europe is an advanced continent with a strong focus on life science.” stated Dr. Tiemin Huang CEO of AES, “We are pleased to be represented by a company of the stature of Isogen Life Science in this important part of the world. Our goal is to continuously improve our customers’ experiences in every aspect.”

“We feel privileged to work with Advanced Electrophoresis Solutions (AES). We look forward to again offer our customers the latest in the field of iCIEF systems. This time extended to an even wider field of use like MS sampling. The combination of the CEInfinite with the AES chemistry will certainly allow customers to improve their results in many ways. Isogen Life Science is looking forward to bring these improvements to Europe.” said Martin Donker, CEO, Isogen Life Science.

#### **About AES (Advanced Electrophoresis Solutions)**

AES is a company dedicated to providing whole column imaging detection capillary electrophoresis systems, reagents and consumables. AES’ total solution encompasses a variety of CEInfinite products and support, which enable clients to focus on protein separation, quantification, and characterization. AES is located in Canada’s Technology Triangle. For more information on AES, please visit [www.aeslifesciences.com](http://www.aeslifesciences.com). To learn more about the CEInfinite technologies and products, please visit [www.ceinfinite.com](http://www.ceinfinite.com).

#### **About Isogen Life Science**

Isogen Life Science B.V. provides a wide range of instruments, reagents and consumables in the areas of cell biology, molecular biology, and biochemistry for biotechnology companies and research institutes. The company is based in De Meern, the Netherlands and operates throughout Europe with people stationed also in Belgium and Spain. For more information on Isogen Life Science, please visit [www.isogen-lifescience.com](http://www.isogen-lifescience.com).
